ITC covers a broad range of services from sales, import/export, finance and leasing of various helicopters and fixed wing aircraft as well as consulting aviation projects and aircraft appraisals.

Aircraft Leasing

Whilst we offer operating leases of our existing fleet and available inventory, we are also constantly seeking opportunities to grow our fleet by offering operators sale-and-lease-back options, as well as acquisitions of new or pre-owned aircraft at our customers' request.

Aircraft and Parts Sales/Auctions

We sell our own aircraft and spare parts, along with those owned by third parties. We specialize in selling some of the finest Japanese pre-owned aircraft, many of which are government owned. Japanese government aircraft are typically maintained to exceptionally high standards and are often available via exclusive closed auctions, of which ITC is a government approved bidder.

Consultancy and Project Management

We provide aviation consultancy and project management services. We have worked with major banks, national airlines, governments and worldwide industry experts on a variety of aviation consultation projects. ITC also provides a range of support services to our financiers and investors.
