ITC covers a broad range of services from sales, import/export, finance and leasing of various helicopters and fixed wing aircraft as well as consulting aviation projects and aircraft appraisals.

## Aircraft Leasing

Whilst we offer operating leases of our existing fleet and available inventory, we are also constantly seeking opportunities to grow our fleet by offering operators sale-and-lease-back options, as well as acquisitions of new or pre-owned aircraft at our customers' request.

## Aircraft and Parts Sales/Auctions

We sell our own aircraft and spare parts, along with those owned by third parties. We specialize in selling some of the finest Japanese pre-owned aircraft, many of which are government owned. Japanese government aircraft are typically maintained to exceptionally high standards and are often available via exclusive closed auctions, of which ITC is a government approved bidder.

## Consultancy and Project Management

We provide aviation consultancy and project management services. We have worked with major banks, national airlines, governments and worldwide industry experts on a variety of aviation consultation projects. ITC also provides a range of support services to our financiers and investors.
